

INTRODUCING MEVCOconnect

Data-Driven insights for your Light Vehicle (LV) fleet

Elevate your LV fleet management with MEVCO^{connect}

Meet MEVCO^{connect}, a cutting-edge digital solution designed to support your LV fleet with valuable data and measurable insights. This platform empowers you to make informed decisions, drive continuous improvement, and enhance fleet efficiency.

MEVCO

At the heart of MEVCOconnect is the Foundation package, which gives mining operations access to key data, insights, and analytics for streamlined operations. We're committed to improving **people, performance & planet**, ensuring your operations align with both your team and the environment. Learn more in the following pages.

MEVCO

Real-time data collection and monitoring

Get a real-time view of your LV operations with vehicle location tracking, sensor data, CO₂ emissions, battery usage, and driver identification. Seamlessly integrate with mine-specific software, hardware, and most third-party cameras, radar, and IoT systems for a complete operational picture.

Advanced analytics for superior performance

Unlock valuable insights into speed, driver behaviour, and safety – all critical to mining operations. Our analytics provide tailored performance tips, driver coaching, safety evaluations, and a pathway to continuous improvement, keeping your team safer and your operations running smoothly.

2

Actionable insights to boost safety & efficiency

Gain real-time diagnostics, maintenance alerts, and energy insights to extend battery life, streamline scheduling, and enhance overall fleet efficiency. This data empowers you to keep your light vehicle fleet operating smoothly and unlock its full potential.

3

MEVCO

Unlock your LV fleet's potential with MEVCOconnect

The launch of MEVCOconnect represents a significant shift in data access for LV fleets in the mining sector. By providing high-quality insights and analytics, we empower you to enhance performance and minimise risks. This essential tool comes with all MEVCO EV purchases, paving the way for operational excellence.

“Through the integration of common mining platforms and mine-specific AI data modelling, MEVCOconnect will enable mine sites and corporate organisations to make timely and strategic decisions.”

– **Ryan Stimpson, CTO, MEVCO**

Stay tuned for further enhancements available with MEVCOconnect coming in 2025 and 2026, which will elevate your operations even further.
