

# DRIVING CHANGE

Why Electric Light Vehicles  
Lead the Charge to **NET ZERO**

## Scalable

MEVCO can provide volume ELVs within short delivery time-frames

## Visible

Attracting talent by demonstrating commitment to decarbonisation

## Least disruptive to implement

Scaled implementation can minimize impact of change and assist with learnings for larger scale adoption

## Tangible

Something the team and investors can see, touch and track benefits

## Testing ground

Learnings from implementation can be applied to other, higher impact aspects of the #netzero journey

## Positive influence and coverage

Being at the forefront of implementing ELVs in mining will attract global media attention

# Insights & reporting

MEVCO can provide powerful data, analytics and insights to help drive ongoing productivity, safety improvements and operational efficiencies.
